FAQ

What's the difference between breathwork and meditation?

Meditation focuses on present moment awareness, and seeks to generate a more settled, focused mind. It asks you to observe your breath *without manipulating it*, whereas breathwork is a form of active meditation which uses breathing practices to try and alter your mood or mindstate. Breathwork is considered as the active meditation and easier alternative for beginner and people who easily get bored and distracted during meditation.

What's the difference between healing breathwork and vinyasa breathwork?

During the session of healing breathwork, you will be in the seated or lying position. It's good alternative if you just want to release the negative emotion after tiring days. Vinyasa breathwork is a fun and more dynamic sequence that combines Vinyasa or commonly known as flow yoga with breathing exercise.

What will I do during sound bath?

Simply, just lie down, find your comfortable position, and listen to the sound played by the practitioner. The practitioner will use various instruments such as tibetan singing bowl, tongue drum, ting sha, rain maker, and chimes.

What's the difference between sound bath and yin yoga & sound healing?

During sound bath session, you just only need to lie down and relax. Meanwhile, you will be guided to do several yin yoga pose to allow deep stretching while listening the sound.

I have scoliosis in my spine. Can I join?

Yes, you can join all classes unless you are prohibited to do exercise by your doctor. However, we suggest you book a private class for yoga and pilates so that the instructor can tailor the movement suit to your needs.
